

Operating Procedures for the GeoXT(XH) GPS Units Using GPS Analyst and GPS Correct

Created by: Nathan Jennings
Adjunct Professor of GIS
American River College

Updated on: July 7, 2008

Background	3
Pre-Requisites	3
Workflow	4
I. GIS Feature Class Set Up in Personal Geodatabases or SDE (<i>ArcCatalog</i>)	5
<i>A. Attribute Domains</i>	6
<i>B. Associate Domain to Feature Class Attribute</i>	6
<i>C. Add GPS Analyst Required Fields</i>	7
<i>D. Version Feature Classes for Editing (SDE Only)</i>	8
II. SDE Feature Classes Check-out to a Personal Geodatabase (<i>ArcCatalog</i>)	9
III. GPS-Enabled the Personal Geodatabase and Feature Classes (<i>ArcCatalog</i>)	10
IV. Check-out Data for Field Use (<i>ArcMap and GPS Analyst</i>)	14
V. GPS Setup (<i>ArcPad and GPS Correct</i>)	16
<i>A. Trimble GPS Set Up – ArcPad Settings</i>	16
<i>B. Trimble GPS - GPS Correct Settings</i>	19
VI. Feature Data Collection Using the GPS (<i>ArcPad</i>)	21
<i>A. Collecting Point Features</i>	21
<i>B. Collecting Line Features</i>	22
<i>C. Collecting Features with Interference or Obstruction</i>	24
<i>D. Updating Existing Features (geography and attributes)</i>	25
<i>E. Deleting Features</i>	26
<i>F. Saving Data and Closing ArcPad</i>	27
VII. Field Data Check-in (<i>ArcMap and GPS Analyst</i>)	27
VIII. Post Processing of GPS Field Data (<i>ArcMap and GPS Analyst</i>)	29
IX. Check-in Personal Geodatabase Feature Classes to Transactional SDE (<i>ArcCatalog</i>)	36
XI. Transfer Updated Transaction SDE to Publication SDE	38
Appendices	39
<i>A. Hardware/Software Used</i>	39
<i>B. GPS Validation Report</i>	39
<i>C. Using a Laser Range Finder for Field Data Collection</i>	41
<i>D. Manual Reconcile and Post of Versioned Edits</i>	45
<i>E. Create a 1-Way Replications of Specified Feature Classes</i>	45
<i>F. Synchronize Changes from Transaction to Publication</i>	47
